ATONG GLORY

Full-Stack Software Engineer

atongglory17@gmail.com | github.com/atongglory | linkedin.com/in/atongglory

PROFILE

Full-stack software engineer focused on building useful web applications with TypeScript, React, and Next.js. This portfolio repository demonstrates a bilingual interface, database-backed content and contact routes, an admin area, and Cloudflare deployment configuration.

SELECTED PROJECT

Bilingual Full-Stack Portfolio

Self-directed

Built with Next.js, TypeScript, Prisma, and Tailwind CSS. The repository includes English and French UI content, project case-study routes, a contact inbox, protected admin routes, and local SQLite / Cloudflare D1 data access.

IMPLEMENTATION HIGHLIGHTS

Typed application routes, bilingual content, responsive UI, persistent contact submissions, optional Turnstile verification, rate limiting, and a documented Cloudflare Workers deployment path.

TECHNOLOGIES IN THIS REPOSITORY

TypeScript, React, Next.js, Tailwind CSS, Prisma, SQLite, Cloudflare D1, Cloudflare Workers, OpenNext, Git
